

Chlor Score 3040

Product Application:

Chlor Score 3040 is a high foaming powdered, chlorinated alkali formulated for manual cleaning of stainless steel equipment using a bucket and brush. With its premium high foaming characteristics it can also be used in some boil-out or COP applications where foam is desired. Chlor Score 3040 uses high foaming surfactants and emulsifiers with chlorine to provide superior cleaning and free rinsing characteristics.

Properties:

Foaming properties: Very high foam

Use Directions:

Chlor Score 3040 is designed for manual cleaning applications in warm water at 1-2% solution strength depending on the equipment and soil. For difficult soils with heavy protein, cleaning will be performed at 0.5 ounce per one gallon of 158-170°F water. Your **PureLabs** representative will work with you to design the best cleaning program for your facility.
