

## HFI 1050

### Product Application:

HFI 1050 is a high foaming blended acid / iodine cleaner especially designed for Foam and Manual Cleaning. The iodine in HFI will indicate any starch soils remaining after alkaline cleaning steps. HFI 1050 contains phosphoric acid, a complex surfactant package and iodine and is extremely effective as a door foaming product to control cross contamination from employee and rolling stock traffic patterns.

### Properties:

Appearance: Clear, brown liquid  
Specific gravity: 1.20  
Foaming properties: Very high foam  
pH of 1% solution: < 2 pH

### Use Directions:

HFI 1050 is designed for use as a door foaming cleaner or manual cleaner at 2 ounces/gallon solution strength depending on the equipment and application. Your **PureLabs** representative will work with you to design the best cleaning program for your facility.
