

## SC Lube 4050

### Product Application:

SC Lube 4050 is a low foaming soap and synthetic based conveyor lubricant designed for slow to moderate speed lines in the dairy, food and beverage industries. SC Lube 4050 is economical and efficient at recommended dilutions with good cleaning ability and is non-corrosive at use dilution.

### Properties:

### Use Directions:

SC Lube 4050 is designed to be dispensed through a central lube dispensing system. SC 4050 is designed to be used with softened water at dilutions of 1/100 – 1/250 depending on the speed and load of the conveyor system. Contact your **PureLabs** representative to work with you to design the lube system specifically for your facility.
